

RED FLAG, OUR EARLY WARNING DECISION SUPPORT SYSTEM (EWDSS), IS AN INNOVATIVE SOLUTION TO HELP DOD CUSTOMERS TO SECURE AND IMPROVE DEFENSE INDUSTRIAL BASE SUPPLY AND SERVICE CHAIN INTEGRITY. RED FLAG HELPS OUR CUSTOMERS IN ANSWERING THE QUESTION, "WILL A SPECIFIC COMPANY BE ABLE TO DELIVER MISSION CRITICAL INDUSTRIAL SUPPLY NOW AND IN THE FUTURE?"

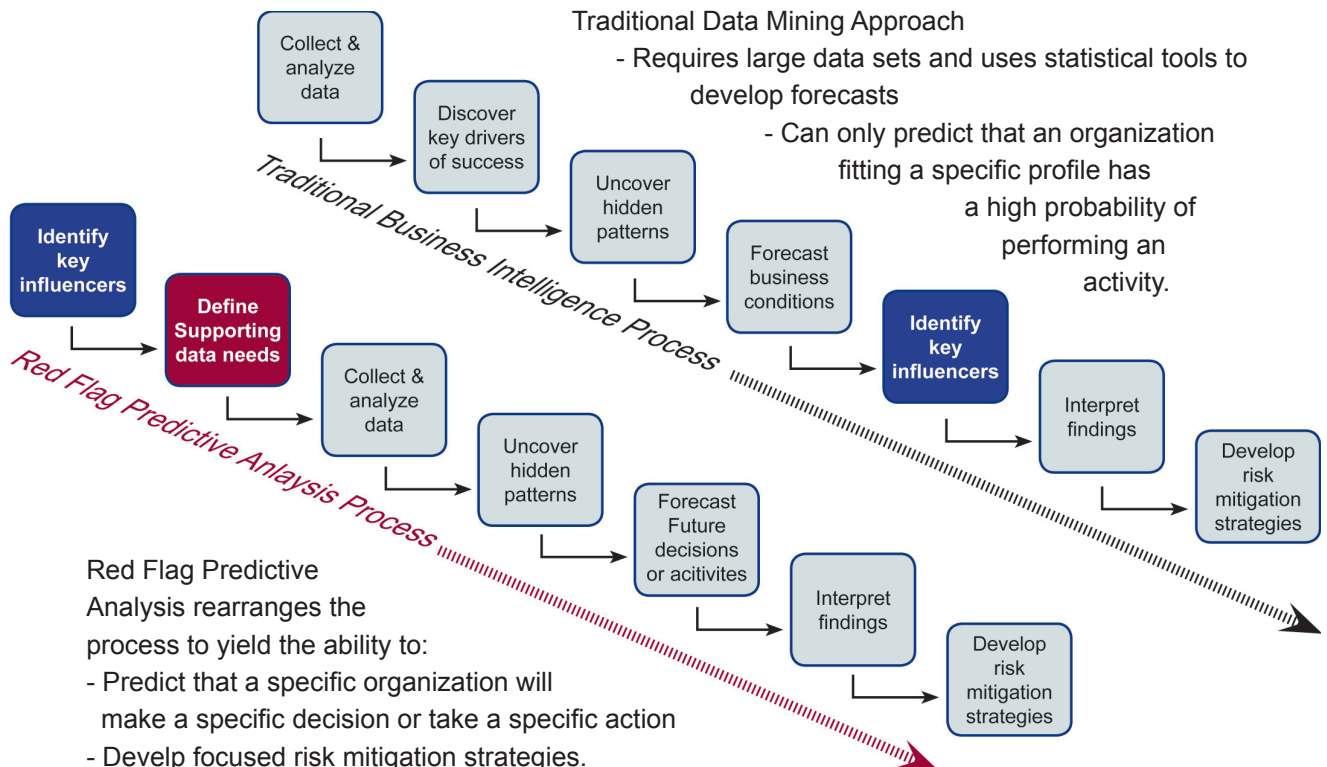

Many organizations struggle to make proactive – rather than reactive – decisions to reduce supply chain risks. They gather data and try to monitor the activities and performance of other companies to improve visibility of changes and risks so they can make the right choices before something goes wrong.

They need detailed and specific information to:

- Proactively manage risk
- Forecast another organization's future decisions or activities
- Avoid disruption of critical supply or service chain elements

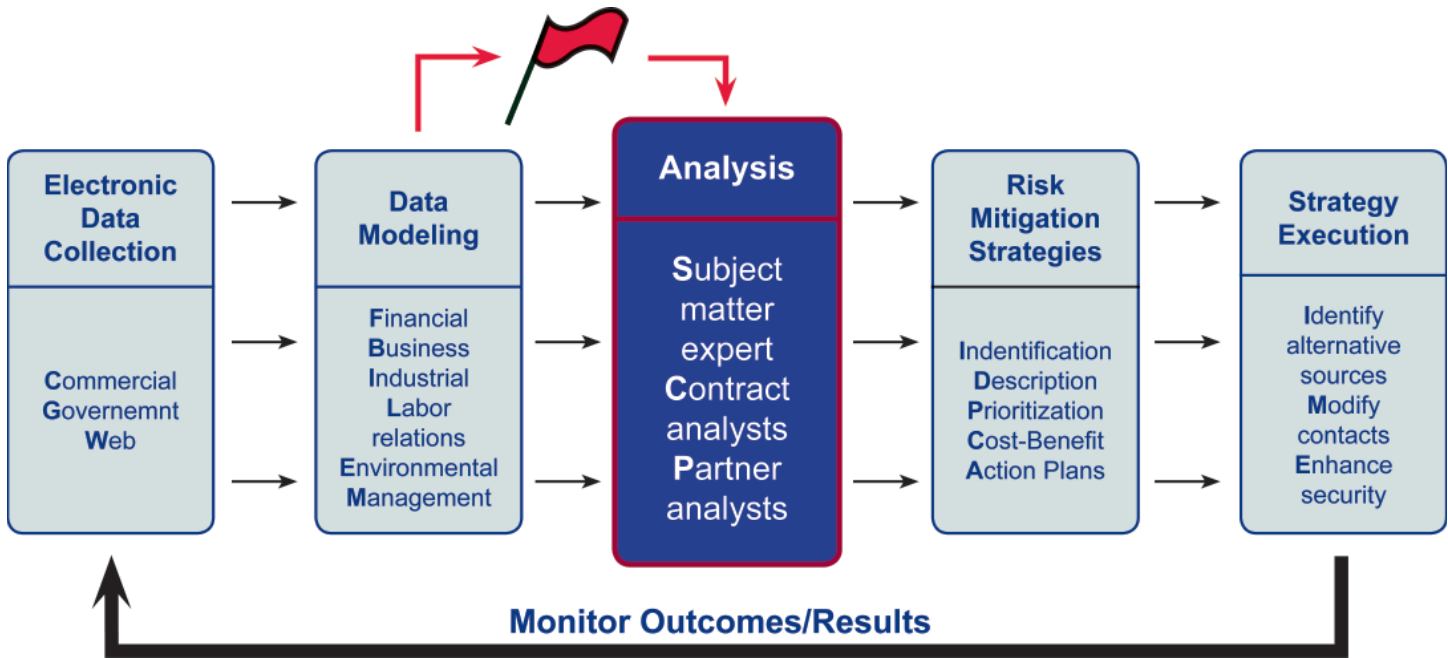

Red Flag EWDSS can predict increased risk that companies will:

- Be unable to meet current or future contract requirements
- Discontinue production of an item
- Relocate plant facilities or production lines
- Experience financial stress
- Seek to be acquired or to acquire other companies
- Experience increased risk of fire or industrial accident

As illustrated below, our proprietary analysis and modeling system sets the flags and our skilled analysts and subject matter experts:

- Evaluate the situation
- Prioritize risks
- Develop proposed risk mitigation strategies including What-If analyses
- Report to you regularly on forecasted risks and potential outcomes

Cost Effective Process

- A single analyst can monitor the activities and outcomes of a relatively large number of companies or groups
- A network of subject matter experts or contract analysts can be leveraged where needed to provide insight on particular types of alerts
- The feedback loop enables the company to refine its risk mitigation strategies and actions to improve outcomes for future flags

The results for you are:

- Increased visibility of potential risks
- Best-of-breed risk mitigation strategies
- Ability to proactively influence outcomes related to risks
- Ability to reduce risks for your organization
